

LEAF Learning about
Ecosystems and Forests

Educate Restore Plant

Educate

Education about biodiversity, climate, well-being and the importance of healthy resilient ecosystems

Restore

Nature restoration: helping to achieve the objectives of the Nature Restoration Law for existing habitats

Plant

Planting (only where appropriate) trees of native-provenance

Who we are

LEAF is an international programme of the Foundation for Environmental Education (FEE) and run nationally by An Taisce

What we do

- Restore, connect and create habitats
- Engage participants at every stage

Who we work with

- Local authorities
- Government departments
- Educational institutions
- Communities and businesses

An Taisce
The National Trust for Ireland

Our work

LEAF — EDUCATING THE EDUCATORS

“The planting of the An Choill Bheag on the college campus was transformative, it’s not just the geography classes that benefitted, other classes are using this wonderful new space. With regards to the workshops, they simply weren’t long enough or frequent enough, we need more of these engaging hands-on workshops.”

Sandra Austin, Senior Lecturer in Social, Environmental and Scientific Education at Marino Institute of Education, Dublin.

LEAF — COMMUNITY PROJECTS

“Thank you to the Castletroy community and schools for taking part in this fantastic tree planting journey. LEAF Ireland have been instrumental in bringing this about, their knowledge and support is greatly appreciated by all. On behalf of Limerick City and County Council, and the GoGreenRoutes project, we hope you, the community, enjoy your woodland and the biodiversity it brings!”

Dr. Sarah O’Malley, EU Project Officer, Limerick City and County Council

LEAF — An Choill Bheag
“The LEAF team certainly has brought something special to our school”

Anthony Liddane,
Principal St Patrick’s
Boys National
School Limerick
